PROFESSIONAL SUMMARY

Final-year Computer Science & Engineering student with internship experience in full-stack development, data analytics, and AI automation. Comfortable building REST APIs, integrating LLMs into workflows, and automating repetitive processes using Python and n8n. Quick learner with a focus on shipping working, practical solutions. CGPA: 7.73.

EXPERIENCE

Software Engineer

Jan 2026 – Present

Cafy Careers (formerly GetLanded) · Remote, UK

- Building career-tech features including a UK job aggregation engine that scrapes 800+ company career pages and ATS providers
- Developed provider-specific adapters and a deterministic UK location filter to improve job data accuracy across listings
- Integrated LLM-based workflows using n8n and Groq API for automated content generation and LinkedIn distribution pipelines

Full-Stack Developer Intern

Feb 2025 – Apr 2025

LearnLogicify Technologies LLP · Coimbatore

- Built responsive web apps and REST API integrations using HTML, CSS, JavaScript, and React/Node.js
- Used LLM-assisted development (Cursor) to reduce development turnaround time on small sprint cycles
- Connected frontend interfaces to backend services and third-party APIs for two client-facing tools

Data Analyst Intern

May 2025 – Jul 2025

Unified Mentor · Coimbatore

- Cleaned and analyzed 100K+ customer records using Python (Pandas) and SQL; built dashboards for stakeholder reporting
- Built a customer satisfaction prediction model using scikit-learn, improving baseline accuracy by ~15%
- Automated weekly data cleaning pipelines using Python and n8n, reducing manual effort significantly

PROJECTS

Zonek · Hyper-Local Market Intelligence Platform

2025 – Present

- A platform that removes guesswork from starting a local business by aggregating live data from Justdial, Sulekha, OLX, and MagicBricks
- Shows entrepreneurs real competitor landscape, rental costs, and community demand in a target area before committing
- AI feasibility layer scores each location and advises whether to proceed, reconsider, or try a nearby alternative

RouteStitch · Multi-Modal Journey Planner

2025 – Present

- Combines Metro, Bus, and Cab data into a single unified journey plan for Indian cities
- AI routing layer dynamically picks the optimal path based on real-time cost, wait time, and distance constraints

SKILLS

Languages: Python, C++, JavaScript, TypeScript, SQL

AI / Automation: LLM Integration (GPT-4, Claude), Prompt Engineering, n8n, RAG Pipelines

Web / Backend: React, Node.js, FastAPI, REST APIs, PostgreSQL, MySQL

Tools: Git/GitHub, Docker, Linux, Figma, Supabase, VS Code

EDUCATION

KIT – Kalaingar Karunanidhi Institute of Technology

2023 – 2027

B.E. Computer Science & Engineering · CGPA: 7.73

SBG Independent Pu Science & Commerce College, Karnataka

Class XII (PCMC)– 75%

2022 – 2023

Kendriya Vidyalaya NO. 3 Machhe , Belagavi

Class X – 71%

2020 -2021

CERTIFICATIONS

Fundamentals of Deep Learning — NVIDIA

Dec 2025

Intro to Prompt Engineering with GitHub Copilot — Microsoft / Simplilearn

Jan 2026

Generative AI Mastering — Outskill

Business Intelligence & Analytics — NPTEL

VOLUNTEERING & ACTIVITIES

NCC Cadet — Selected for Advanced Leadership Camp (Top 16 out of 100+); led a platoon of 20+ cadets

Karate — Active practitioner · **College Basketball Team** — Member
